DETAILED ACTION

Priority

1. This application has no priority claim made. The filing date is 08/28/2003.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121:

Group I. Claims 1-13 drawn to information security: prevention of unauthorized use of data including prevention of piracy, privacy violations, or unauthorized data modification, access control, classified in class 726, subclass 27.

Group II. Claims 14-19 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly computer-to-computer session connection establishing in network resources access controlling, classified in class 709, subclass 229.

Group III. Claims 20-27 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly computer network managing in computer network access regulating, classified in class 709, subclass 225.

Group IV. Claims 28-35 and 36-43 drawn to information security: prevention of unauthorized use of data including prevention of piracy, privacy violations, or unauthorized data modification, access control, classified in class 726, subclass 27.

3. The invention are distinct, each form the other because of the following reasons:
 - a. Invention I, II, III and IV are related as subcombination disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate function

such as receiving and validating code; invention II has separate function such as disabling on-demand resource; invention III has separate function such as claiming, by a logical partition function, on-demand resource; and invention IV has separate function such as recording compliant states and capacity management. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Art Unit: 2144
